Professional Summary

Final-year BCA student blending full-stack web development and IT operations expertise with hands-on inside sales experience. Skilled in C++, Python, Django, MySQL, client relationship management, and financial product sales. Proven track record of evaluating technical/financial requirements, streamlining digital document workflows, and resolving complex problems in fast-paced environments. Seeking to leverage technical skills, consultative selling ability, and strong communication to drive value in software engineering or client-facing technical roles.

Professional Experience

Inside Sales Executive

3/2026 – 8/2026

[Finolink Business consultation Pvt. Ltd | Noida, India](#)

Executed digital outbound sales for Personal Loans, Overdrafts, and Balance Transfers to help clients optimize interest rates. Evaluated applicant eligibility via CIBIL credit reports, conducted digital document verification, and processed online loan applications across partner bank portals (HDFC, Axis, ICICI, IDFC, Yes Bank) through designated agent channels. Managed application tracking through final loan disbursement to ensure full compliance.

Information Technology

1/2024 – 12/2024

[Holly International School, Exam lab | Delhi, India](#)

Managed hardware, software, networking infrastructure, server room operations, and server maintenance for high-stakes examination environments, ensuring 99.9% uptime during peak testing periods, collaborated with exam coordinators to troubleshoot technical issues in real-time, preventing disruptions for 500+ daily test sessions and maintaining seamless exam delivery.

Software testing + monitoring

10/2023 – 12/2023

[IxCheck | Noida, India](#)

Involved in deployment, configuration, and performance testing of examination software across multiple systems in secured lab environments. Supported unique system identification, remote performance monitoring, and real-time troubleshooting to ensure software stability, reliability, and compliance during high-stakes, large-scale online examination.

Projects

Shiksha Path

Technologies: Django,MySQL

URL: <https://shiksha-path.online>

Shiksha Path is an online learning webapp on which instructors can create their teaching notes/assignments/pdf/ and other material into 3d animation and create different courses and sell them to the student for more convenient way of learning.
